MIMS for Mobiles

Please note: This guide covers access to MIMS on iOS or Android devices. If you need assistance with accessing MIMS from a different device, contact the library.

Registration

This process must be done from a computer connected to the SA Health computer network.

Click on the Apps for mobiles link in the navigation menu.

You can also click on the MIMS for Mobiles link in the dropdown menu.

Click on the MIMS for Mobile icon.

If you receive a 403 error, try again from a computer that is connected to the SA Health computer network.

Click on the icon that matches the device that you are going to use the MIMS app on.

(If you want to use the MIMS app on a Samsung phone or tablet click on MIMS for Android.)

Enter your email address. This does not need to be a SA Health email address.

Click Proceed.
A registration form will load. Fill in the requested details. Click the Complete Registration button when done.

A new screen will load (as below). Make a note of your unique token. You will also receive an email containing this token. To maintain your access to MIMS you will need to reregister from a SA Health networked computer once a year.

MIMS Apps on Mobiles
To access MIMS on your phone visit your app store and search for MIMS Australia. Your device must be registered to the Australian store.

To access the app enter your unique token into the Enterprise Token field and tap Sign In.

You do not need to provide your name or password.

If you have any issues with accessing MIMS, contact the library and we’ll help you out.
