Renew Your UpToDate Access

This renewal process must be done from a computer connected to the SA Health computer network.

To maintain your access to UpToDate you will need to Log In from a SA Health networked computer every 90 days (approx. 3 months).

Start by visiting the SALUS website at www.salus.sa.gov.au

Click on the UpToDate icon in the Shortcuts box on the right side of the screen.

You will be taken to the UpToDate website.

In the top right corner you should see SA Health Library Network. If this is missing your computer is not on the SA Health computer network. You should try again on a different computer.

Click the Login button at the top right of the screen. Enter your username and password. Click Log In.
Click the Accept License button on the Subscription and License Agreement. Click View License to see the license. You can use the back button to accept the license after you have read it.

Your access to UpToDate from all platforms should be restored. For ongoing access to UpToDate you will need to repeat this every 90 days.

If you have any issues with accessing UpToDate, contact the library and we’ll help you out.
